Union Jack: Stainless Steel Crushpad Tools

I grew up on a farm so I've been using **Union Jack** tools since I was a kid. As a winemaker, I've continued using their food-grade plastic tools on my crushpads. The plastic tools are adequate, but I was excited to see these stainless steel crushpad tools. There's also a rumor that Union Jack is going to add a punch-down tool to the lineup.

What's Cool: Stainless steel crushpad tools are obviously more durable than tools made from food-grade plastic. They are also easy to sanitize and should last many years.
