## **New British Imports Arrive in America Unifork and Unirake Designed to Move Grapes and Pomace**

January 7, 2008 - Union Jack Stable & Garden has announced several new hand tools designed specifically for the handling of grapes and pomace. These light-weight tools can help vineyard and winery owners increase productivity and reduce labor costs by moving and processing grapes faster and more efficiently than ever before.

The British made **Unifork**, **Unirake** and **Solid One-Piece Hygiene Shovel** are currently in use at wineries and vineyards throughout Europe and are now available here in the United States. The **Unifork** and **Unirake** have tapered and star-profiled tines that enable easy piercing and gathering of grapes and pomace. The material-facing surface of the tines are flat, not round, giving these tools superior handling qualities compared to anything else on the market – and they won't scratch or damage your stainless steel tanks.

The curved back of the **Unifork** aids in removing material from the bottom of vats and tanks. The tapered tines guide the grapes and pomace into the rear of the fork allowing large loads to be moved without spillage. The **Unirakes'** long five foot handle makes it easy to remove grapes from elevated bins. The **Solid One-Piece Hygiene Shovel** is tough, light-weight and easy to clean. The Shovel can hold and scoop large amounts of grapes and must. All products are made of high-grade polypropylene which is virtually unbreakable and immune to rust or rot.

These tools are approved under FDA regulations for direct food contact. The **Unifork**, **Unirake** and **Hygiene Shovel** can handle all your grape, olive and fruit handling needs. These three new tools can be purchased directly from Union Jack Stable & Garden. Union Jack is the exclusive USA distributor of the **Unifork**, **Unirake** & **Hygiene Shovel**. Union Jack can be reached toll free at 800-672-8119 or at [www.unionjackstable.com](http://www.unionjackstable.com).
